#### **ICPSR PROCESSING NOTES FOR #21282**

International Military Intervention, 1989-2005

- 1) Variable and value labels: Added missing variable and value labels.
- 2) Variable formats: Reformatted variables to match data.
- 3) Missing values: Recoded the 3 system missing values in var\_026 to 0 per PI instruction.
- 4) Undocumented code: 199701570 in var\_004 is undefined and was labeled as such.
- 5) Outliers: Recoded the following outliers in the variables listed below:

var\_013: 999 and 99999999 to 9999999 var\_014: 999 and 99999 to 9999999

var\_015: 999, 999999, and 99999999 to 9999999

# **Data Completeness Report [Total and Valid]**

Notes: (1) Variables are individually listed only if they have greater than 5% missing data. These variables are listed under the appropriate percentage category in the order in which they appear in the data file. (2) The Data Completeness Report only captures information about system missing or other values that are declared missing. Codes that have a label implying that they are missing but that are not declared missing values are not reflected in this report. Data users should consult the codebook for more specific information about missing values. (3) Some variables that have 100% missing data may have been blanked by ICPSR to protect respondent confidentiality. Data users should consult the codebook for more specific information about blanked variables. (4) Data do not contain skip patterns or skip patterns are not reflected in the data as coded.

Table 1: Distribution of Variables by Percentage of Missing Values

Variable Name and Label (Total Cases = 447)		Percent of Cases with Missing Values
		Skip Total
100.0% (27 of 27 variables)	have 0% Missing Values	
0.0% (0 of 27 variables)	have 0% - 1% Missing Values	
0.0% (0 of 27 variables)	have 1% - 3% Missing Values	
0.0% (0 of 27 variables)	have 3% - 5% Missing Values	
0.0% (0 of 27 variables)	have 5% - 10% Missing Values	
0.0% (0 of 27 variables)	have 10% - 20% Missing Values	
0.0% (0 of 27 variables)	have 20% - 40% Missing Values	
0.0% (0 of 27 variables)	have 40% - 100% Missing Values

#### **CODEBOOK**

#### INTERNATIONAL MILITARY INTERVENTION, 1989-2005

**Principal Investigators**

Kansas State University

First ICPSR Release October 2007

Inter-University Consortium for Political and Social Research PO Box 1248 Ann Arbor, Michigan 48106

#### **Background and Definitions**

This update of the IMI data set extends the original IMI (OIMI) collection (ICPSR 6035) from 1989 to 2005. To ensure consistency across the entire 1946-2005 time span covered by IMI, this update has followed OIMI's coding guidelines.

Operational Definition. "Military interventions are defined operationally in this collection as the movement of regular troops or forces (airborne, seaborne, shelling, etc) of one country inside another, in the context of some political issue or dispute" (Pearson and Baumann, 1993, 1). Paramilitaries, government backed militias, private security forces, and other military forces that are not part of the regular uniformed military of the state are excluded. Similarly, events must be purposeful, not accidental. Random or inadvertent border crossings are not recorded, nor are unintentional confrontations between fighter planes or naval ships. Soldiers engaging in exercises in a foreign land, transporting men or material to another destination or on leave are omitted as well. Soldiers concentrated in foreign bases are excluded, unless they leave the barracks explicitly to take part in a military mission in the host state. Military advisors are included only when they engage in direct combat.

International military interventions are also delimited by temporal guidelines. Interventions are considered continuous if repeated acts occur within six months of one another. A good example from the current collection is Turkish intervention into Iraq to attack Kurdish strongholds. We code this as a continuous intervention from August 5, 1991 to July 6, 2003. No six month period exists between these dates when Turkish troops or planes did not launch a new attack on Kurdish positions within Iraq (information on each individual mission is available from the authors). If, however, a state withdraws troops from a target state and then sends them back again more than six months later, the latter incursion is coded a new intervention.

New interventions are also differentiated with one substantive criterion. A new intervention is coded if the direction of an intervention changes, such as from supporting the target government to opposing it. Intervention direction is captured by variable 6 in IMI.

Further information can be found in supporting documentation for OIMI (ICPSR 6035) and in the related publications listed on page 4.

Multinational Interventions. Multinational interventions are coded if participating soldiers from different states act under a unified military command. If more than one state intervenes in a target state at a given time and each intervener retains their own distinct military command structure, separate unilateral interventions are recorded. Differentiating unilateral and multinational interventions in this way follows the practice of OIMI and of Regan (2002, 102). Whenever possible, ICOW codes for multinational actors were used. In cases were ICOW does not provide a code for the intervening actor (particularly for "one-off" and/or ad-hoc multinational missions, most common in the 1990s and early 2000s), we provide a new actor code beginning with the number 3000 and following COW and ICOW procedures.

Actor Codes for Ad-Hoc Missions. ICOW does not include actor codes for non-permanent organizations. Since the IMI update includes 13 multinational interventions by actors that will not be coded by ICOW given their ad-hoc, temporary character, we generate our own actor codes for these multinational interveners. COW state codes fall between 1 and 999, ICOW global non-state actors are between 1000 and 1999, and ICOW regional non-state actors are between 2000 and 2999. Consequently, we use 3000-3999 to code ad-hoc multinational interveners. The new codes are:

Multinational	
Actor Code	Coalition name or event
3040	US-led multinational force in Haiti, 1994-1995
3300	Italian-led multinational force in Albania, 1997
3482	MISAB (Inter-African Mission to Monitor the Implementation of the Bangui Agreements) operation in Central African Republic, 1997-1998
3500	US-led operation (Operation United Shield) to evacuate UN troops in Somalia, 1995
3600	Operation Provide Comfort in Northern Iraq, 1991-1996
3601	Operation Northern Watch in post-Persian Gulf War I Iraq, 1997-2003
3602	Operation Southern Watch in post-Persian Gulf War I Iraq, 1992-2003
3700	ISAF (International Security Assistance Force) in Afghanistan, prior to NATO's assumption of ISAF role, 2001-2003
3850	Australian-led multinational force in East Timor prior to United Nations' UNTAET mission, 1999-2000
3900	South Pacific peacekeeping force in Papua New Guinea (Bougainville), 1994
3901	New Zealand-led Truce Monitoring Group present during negotiations in Bougainville, Papua New Guinea, 1997-1998
3902	Australian-led Peace Monitoring Group takes over for Truce Monitoring Group in Bougainville, 1998-2003
3903	Australian-led regional peacekeeping mission to Solomon Islands, 2003-present

We also provide an actor code for Western Sahara, a disputed territory that has yet to receive a COW code:

WP- Washington Post WND- World News Digest Xinh- Xinhua News Service Sample: All verified cases of international military intervention from 1989 to 2005.

Data Source: Lexis-Nexis Academic web program and published secondary sources, including journals focusing on particular regions of the world, and books.

Data Processing: We began with a key word search in Lexis-Nexis Academic for each year in the update. We searched in the Lexis-Nexis categories "Major U.S. and World Publications," "News Wire Services," and "TV and Radio Broadcast Transcripts" for the following terms:

- military intervention
- peacekeeping
- border dispute
- territorial dispute
- border conflict
- air raid
- air incursion
- naval incursion
- military incursion
- troop deployment
- military raid
- cross-border raid
- bombardment
- cross-border firing
- cross-border shelling

Four trained and supervised undergraduate students and one graduate student used Lexis-Nexis to search for each of these terms in each year of the update. To insure inter-coder reliability, each coder compiled data on the cases they found and the additional research they initiated to provide complete information on the intervention episode separately. A team of four graduate students looked for further information in academic journals focused on specific regions of the globe. Both principal investigators then independently evaluated all of the cases compiled and gathered further information from secondary sources before comparing their results to produce the final data collection.
